SKILLS

PROGRAMMING

•Core Java • C++

FRONTEND DEVELOPMENT

• Html • Css

• JavaScript • Angular

• Angular Material • TypeScript

OTHER SKILL

• Android • Splunk

• ELK • Nodejs

• Express JS • Azure

• MongoDB • React Js

CERTIFICATION

Android With Core Java

EXPERIENCE

TATA CONSULTANCY SERVICES | ANGULAR DEVELOPER | ANDROID

August 2021

- Actively Participate in scrum ceremonies -planning, demos, retrospectives Collaborate with other team members to ensure solutions are best practice.
- Created reusable components to make the application more modular.
- Intergation of Elk with Angular capturing the logs.
- Implement the **Infinite Scroll** to avoid the page being unresponsive and handle a large amount of notifications on UI side.
- Update the angular **application from 13 to 14 version**.
- Enhance the UI of angular application Build a Dynamics form using **formly form** Library using plotty plot graph to display the API data using different types of graph line-chart,donut-chart.
- Design a **theme** for angular application using **angular material**

ANDROID DEVELOPER

Nov 2021 – Dec 2021 | 2 Month

- Worked on the UI part of App
- Design Responsive Layout using **Relative Layout** and **Constraint Layout**
- Integrate **Splunk** in Android to capture the logs and track the user

PROJECT

PORTFOLIO | ANGULAR APPLICATION

- Portfolio app to showcase my skill and projects
- using **plotty plot graph library** to display skill using donut chart, piechart,line-graph and use angular material for designing.
- used angular, angular material, and plotty plot graph. Covid19App:// <https://github.com/adarshdwivedi123/COVID19app>

CAMERA APP | JAVASCRIPT APPLICATION

- Camera web app to record the video and capture the images stored in the **indexedb database** provided by javascript
- we can add different filters while capturing the image and store in **indexDB database**.
- we are able to delete and download the video and images .
- used javascript **WEB API canvas,indexDB**

WEATHER APP | JAVASCRIPT APPLICATION

- weather app to display the current weather of the user on the basis of Longitude and Latitude
- we can search any weather know the weather of any place.
- used local storage to store the coordinates of the user and news api for data.
- used vanilla javascript and CSS.
